Company \_\_\_\_\_ Location \_\_\_\_\_ Date \_\_\_\_\_

**Vol 16 - No 45 HAZCOM SAFETY**

Hazard communication programs are mandated by OSHA. General contractors must hold all trades in compliance with 3 components of this program so as to ensure the safety of all employees onsite.

1. A complete and viable Material Safety Data Sheets inventory to be delivered to the general contractor prior to materials delivery
2. Proper labeling of all containers stored and in use at work location and when possible using the NFPA identification warning labels
3. Training of all employees of their right-to-know of hazardous materials onsite so they may recognize or ask for assistance in avoiding hazards
