## Vol 16 - No 17 HOUSEKEEPING ACCIDENT

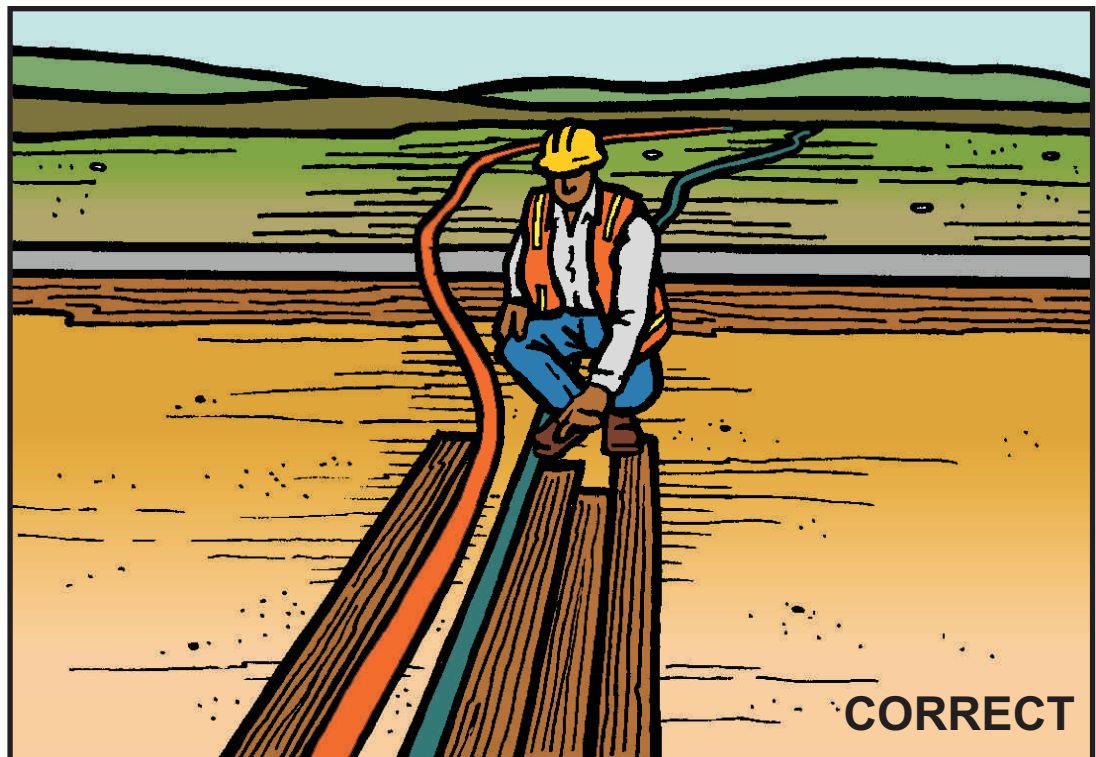

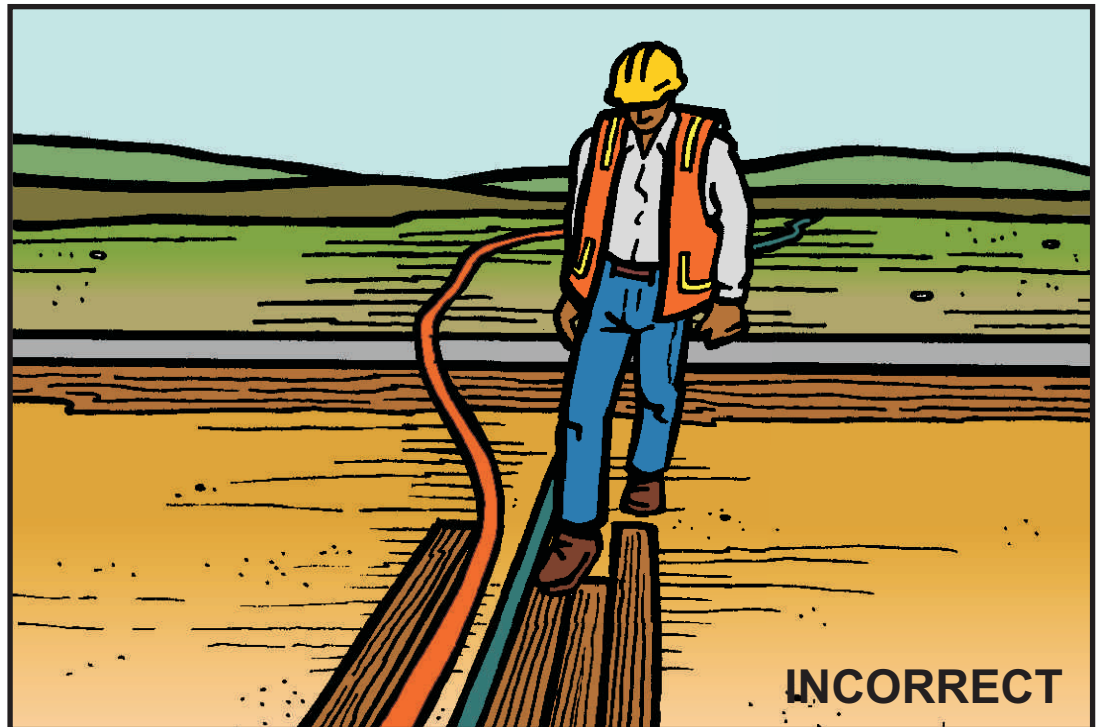

### INCIDENT DESCRIPTION:

Even the simplest tasks on a job site can cause injury if performed incorrectly.

A worker was setting 4 x 4 wood lumber on each side of water hoses to protect them from traffic. The worker noticed one of the 4 x 4's had shifted away from the hoses and he tried to kick it into place.

Unfortunately, he slipped while kicking it and fell. He landed improperly and broke a bone in his foot.

**SAFETY RECOMMENDATION:**  
If the worker had simply bent down and moved the wood 4 x 4 over with his hands, a loss time accident could have been avoided. Don't take shortcuts that can cause an accident. Do the job right!
